KAMIL KOZŁOWSKI

JUNIOR JAVA DEVELOPER / TEST TEAM LEADER

I'm a passionate and highly motivated Junior Java Developer with strong electronic and testing professional background.
Recently I have graduated InfoShare Academy Java and Spring BootCamp, where I developed Library project with my team. Also I developed one-page website to present my portfolio, Tool Box online project, Movie JDBC, To Do list and some other small projects available on my GitHub.

I look for an opportunity to develop my skills in developing web and desktop applications using Java and implementing databases. I am a fast-learner and I'm eager to learn best practices from more experienced and knowledgeable experts.

SKILLS

KNOW IT WELL

Java
Git / GitHub
Maven
Spring Framework
Thymeleaf
Scrum
SQL
Hibernate
Junit / AssertJ
REST API
HTML
CSS

EDUCATION

infoShare Academy
Bootcamp (445 h)
JAVA + SPRING

02/2023 - 08/2023

Scope:
- Java programming in OOP, FP, GP, MT, SP paradigms
- Spring framework + Spring Boot
- Database design and management
- Working with version control system Git
- Writing unit and integration tests and debugging code
- Applying basic design patterns
- Running applications in Docker environment
- Exposing and consuming REST API interfaces
- Teamwork in Scrum methodology

Online Library project implementation in Scrum:
Web service development for a library with functionalities for book and user management

ZST im. Mikołaja Kopernika w Kwidzynie
2001 - 2004

Electronics Engineer
Specialization: Computer Systems and Networks

PROFESSIONAL EXPERIENCE

Test Lead UTR
01.2019 - Up to today

JABIL POLAND
Kwidzyn

-Team management of 20 electronics professionals.
-Coordination and supervision of the electronic circuit testing process, fault identification, and development of troubleshooting strategies.
-Machine maintenance planning.

Senior Technician
01.2015 - 12.2019

JABIL POLAND
Kwidzyn

-Coordinating the shift of 5 technicians.
-Detecting faults in electronic testers.
-Basic programming and supervision of work on FANUC and ABB industrial robots, as well as ICT HP 3070 machines on UNIX systems.
-Test environments, Test Stand, LabVIEW, PLC.

CERTIFICATIONS

Bootcamp JAVA + SPRING by infoShare Academy: 445 h

Spring Boot 3, Spring 6 & Hibernate by Udemy: 46 h

LEAN Bronze level by Lean Six Sigma

Build your own applications by Udemy: 44 h

Java - Spring Framework Udemy: 20 h

Unit Testing JUnit 5, AssertJ Mockito 2, TDD by Udemy: 6h

PROFESSIONAL EXPERIENCE (CONTINUATION)

UTR Test Technician
04.2010 - 01.2015
JABIL POLAND Kwidzyn

-Troubleshooting technical issues.
-Diagnosing faults and repairing various electronic circuit testers.
-Configuring test environments on Windows and Unix.

Electronics Engineer
11.2009 - 04.2010
JABIL POLAND Kwidzyn

-Troubleshooting design issues with products.
-Identifying and repairing defects in electronic products arising from errors in the production process.

Electronics Engineer
06.2008 - 11.2009
LACROIX Kwidzyn

-Identifying and repairing defects in electronic products resulting from errors in the production process.

Maintenance Technician
09.2007 - 05.2008
The Pizza Factory Nottingham

Maintenance of production machines

Quality Control
06.2006 - 09.2007
ZEM Polmo Kwidzyn

Quality Control of component deliveries for automotive subassembly production.

IT PROJECTS

Online Library

As a team member I developed Java application, which is a Library web page for book management based on user roles and permissions matrix (readers and librarians).

To Do list

The application provides full control over user's tasks. It allows task grouping and task status management.
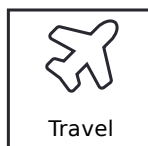

Tool Box

An online tool box, providing the ability to search, add, delete, and edit tools in the box.

Movie JDBC

Implementation of a movie database using Spring Boot and MySQL database with Docker. Available functionality - CRUD.
